SCARD

Syntax

```
SCARD key
```

Available since: 1.0.0
Time complexity: O(1)
ACL categories: `@read`, `@set`, `@fast`

Returns the set cardinality (number of elements) of the set stored at `key`.

Examples

```
● ▲ ★

redis> SADD myset "Hello"
(integer) 1
redis> SADD myset "World"
(integer) 1
redis> SCARD myset
(integer) 2
redis>
```

RESP2 Reply

Integer reply: the cardinality (number of elements) of the set, or `0` if the key does not exist.

RESP3 Reply

Integer reply: The cardinality (number of elements) of the set, or 0 if the key does not exist.
